GMT aerodynamics clancy pdf - Aerodynamics, from Greek $\alpha\epsilon\rho$ aer (air) + $\delta\upsilon\lambda\alpha\mu\iota$ dynamics

(dynamics), is the study of the motion of air, particularly its interaction with a solid object, such as an airplane wing. It is a sub-field of fluid dynamics and gas dynamics, and many aspects of aerodynamics theory are common to these fields. The term aerodynamics is often used synonymously with gas dynamics, the difference being ...
